

Huo Jiang

Computer Science Graduate | Data Science & Software Engineering

📍 Leipzig, Germany ✉ hurjiangde@outlook.com 🌐 hurriyclear.github.io 🌐 hurriyclear 🌐 hurriyclear

Summary

I am a graduate in computer science with a background in engineering and hands-on experience in software development, data science and NLP research. During my studies I participated the coursework and projects spanning databases, machine learning, and software engineering and have developed my skills in building full-stack web applications and data processing pipelines. Notably, in my thesis I worked with the Webis Group on building a new question answering dataset.

Education

University of Leipzig • M.Sc. Computer Science	Leipzig, Germany May 2026 – present
University of Leipzig • B.Sc. Computer Science (GPA: 1.6, German scale where 1.0 = highest) • Thesis: Towards Building a Question Answering Dataset from Search Engine Result Pages • Key Courses: Database, Machine Learning, Software Engineering, Natural Language Processing	Leipzig, Germany Oct 2022 – Apr 2026
Leipzig University of Applied Sciences • M.Eng. Printing and Packaging Technology (GPA: 1.4, German scale where 1.0 = highest) • Key Courses: Media Production Technology, Media Systems Engineering	Leipzig, Germany Apr 2021 – Mar 2022

Experience

Webis Group (University of Kassel) , Student Research Assistant – Kassel, Germany • Integrating the AQL-QA codebase into the main project pipeline • Studying question answering dataset and its applications • Studying web technologies and information retrieval methods	June 2026 – present
--	---------------------

Projects

AQL Question Answering Dataset – Jena, Germany Tech Stack: HTML, JavaScript, XPath, Flask, Elasticsearch, Ray, S3 storage, BeautifulSoup4 • Built a novel pipeline for constructing a QA dataset by parsing search engine result pages (SERPs) • The resulting dataset contains 211K question-answer pairs in four languages (English, Chinese, German, Russian), spanning 2014–2025 and four search providers (Bing, Google, Baidu, Yandex) • Developed an annotation tool for labeling search engine result pages • Systematically analyzed the HTML structure of four search providers and implemented XPath parsers to extract question-answer pairs	Aug 2025 – present
Restaurant management platform (Yummy-spicy) – Leipzig, Germany Tech Stack: Spring Boot, MySQL, Redis, MyBatis • Designed and implemented RESTful APIs using Spring Web • Connected backend with MySQL via MyBatis and Redis via Spring Data Redis • Implemented global exception handling and unified error code system • Utilized HttpClient for communication with external services	June 2025 – present
Credit Transfer – Leipzig, Germany Tech Stack: Spring Boot, PostgreSQL, Docker, Auth0, PDFBox • Built a web application to streamline course credit transfer processes at university • Developed secure REST APIs and JWT authentication with Auth0 • Designed PostgreSQL schema and integrated with Spring Data JPA • Implemented dynamic PDF generation with Apache PDFBox • Wrote unit, integration, and security tests using Maven Surefire/Failsafe and H2	Oct 2023 – Mar 2024

Skills

Languages: English (C1), German (C1), Chinese (Native)

Programming: Python, Java, Lua, SQL

Frameworks: Spring, Flask, Vue, React

Data Science: NumPy, SciPy, Pandas, sklearn

DevOps & Tools: Git, Docker, Ray

Database: MySQL, PostgreSQL, Redis

Research Areas: Natural Language Processing, Information Retrieval
